## **Technical Skills:**

**Strong:** JavaScript, Node, Express, Meteor, Angular, Backbone, SQL, MongoDB, Azure, Unity3D, jQuery, HTML, CSS, Bash

**Experienced:** Python, C++, C#, Visual Studio, Backbone, D3

## **Work History:**

**Meyer Computer**, Software Engineer, Maui, HI Current

- Build custom websites for a wide variety of clients.

**yournetwork.tv**, Software Engineer, San Francisco, CA2014

- Website where users watch online videos together.
- Created the site in its entirety. Foundation technologies include Meteor and famo.us.

**GoonTu.be**, Software Engineer, San Francisco, CA2014

- Website where users watch online videos together. Typical concurrent users ranges from 20-60; depending on the time of day.
- Developed a stand-alone feature which allows a user to change the layout of the website to a full screen mode while maintaining all the functionality of the site.
- Implemented a large, popular feature without having access to anything other than the website.

**Open Source Text Books** - Software Engineer2014

- Website where users can create digital text-books by selecting pages from other user's books to incorporate into their own. Features a document editor, which converts simple text into internet-ready HTML, with the ability to work on the same document with others at the same time.
- Implemented and designed the front-end layout. Connected front-end components to back-end functionality.
- Created a product useful to users without having a personal experience with the domain it serves.

**Transcode** - Software Engineer & Computer Science Instructor2014

- Course focusing on programming fundamentals of Python to a student body of twenty for one semester.
- Developed a website which contained interactive homework assignments. Assisted students with coursework and lectures.
- Empowered non-traditional students with confidence in their ability to understand the material.

**Pyladies** - Computer Science Instructor

2013

- Weekly programming workshop offering a woman-only space with an average

attendance rate of thirty, ran for five months.

- Guided students through weekly exercises, and assisted students individually on anything they wanted help with.
- Fostered a safe space for women where they were free from prejudice and treated with the respect they deserve.

## **Dungeon Crawl Stone Soup - Software Engineer 2013**

- Open-source video game; among the most popular games of its type.
- Provided bug fixes, addressed tickets, and added new content.
- Isolated and fixed a bug without knowing when or where it was introduced into non-trivially sized codebase.

## **EDUCATION**

- **Hack Reactor**, Software Engineering Immersive, San Francisco, CA  
2014
- Transcode, see above
- Various Coursework - C++, Intro to Programming, Unix  
2009-2013
